

CE Marking of industrial doors

Emmerson doors recently completed the installation of roller shutter door a large grain store constructed by Simpson & Allinson, the store has been constructed for Walkers Grain storage at Pocklington Nr York. (please see attached pictures)

All doors have been manufactured and installed to comply with European Harmonised process standard **BSEN13241-1**. This standard requires testing of individual components and the implementation of a Factory control process quality system. (Please see attached photo of shutter curtain being tested)

As of July 2013 it has become a legal requirement that roller shutter doors are manufactured to meet the European harmonised process standard BSEN13241-1.

Emmerson door products are manufactured to meet the requirements of BSEN13241-1 and are supplied with a CE mark to show compliance.
