

Grainsafe Smartprobe – 100% Customer Satisfaction

Since the launch of the Grainsafe Smartprobe in 2012, 100% of users who responded to a satisfaction survey scored the product as very good, or good, for overall product design, ease of use, durability, labour saving and value for money. Micheal Summers from Grainsafe said “we are delighted with the response, our objective is to provide products that completely satisfy user’s needs and it is reassuring we are achieving this. The best comment we’ve had is that the product is ‘simple to use’ this is exactly what we intended! It’s really pleasing to see customer who purchased Smartprobes last year, buy more this year’.

The Grainsafe Smartprobe is an innovative grain temperature monitor, designed to be left in the grain 24/7 and visually reports grain temperatures using an array of LED’s which can be viewed from a distance. Prices start from £155.00 + VAT. www.grainsafe.co.uk
